Subject: Nadcap Welding Checklist Revisions and new Supplements
Date: Tuesday, December 22, 2009 3:32:28 PM

Dear Nadcap Weld Program Participant:

The Weld Task Group has revised its Audit Criteria (AC7110, AC7110/1-9, AC7110/12, and AC7110/13) and has introduced User Member Supplemental Criteria (AC7110/3S, AC7110/4S, AC7110/5S, AC7110/6S, AC7110/12S and AC7110/13S). Note that not all Audit Criteria have corresponding User Member Supplemental Criteria. This notification serves as the announcement of those revisions.

PRI Operating Procedure requires a 90-day notification of checklist revisions prior to their use in Nadcap audits. Thus, all Weld audits initiated on or after April 4, 2010 shall utilize the revised Audit Criteria and Supplemental Criteria. Audits initiated between now and April 4, 2010 are encouraged to follow the new checklists and supplemental criteria.

All of the Audit Criteria and User Member Supplemental Criteria mentioned above can be found in Resources menu of eAuditNet by choosing Documents and clicking on Audit Checklists then by filtering on Welding. Any changes made to the Audit Criteria are denoted by a vertical line to the left of the change.

Corresponding Handbooks are available for the new checklist revisions and can be located in the Resources menu of eAuditNet by choosing Documents and clicking on Public Documents, then Welding and Handbooks.

This change is predominantly to align the checklists in a standard Nadcap format, with unique Prime requirements being removed from the main checklists and added into the User Member Supplemental Criteria checklists. The Task Group has also taken the opportunity to allow limited usage of N/A answers. These can however only be used as defined in the checklists.

Should you have any questions regarding these revisions, please feel free to contact a member of the Nadcap Weld Department:

Ian Simpson, Senior Weld Staff Engineer, +44 1332 869272, ian.simpson@pri-europe.org.uk;
Mike Gutridge, Senior Staff Engineer (AQS/NDT/Welding), +1 740 587 9841, mikeg@sae.org

Best regards,

Nadcap Weld Task Group
